

AITP Chicago Chapter is proud to support the IT Governance Special Interest Group (SIG) which provides a professional forum for the exchange of ideas among Chicago area IT leaders related to the design and implementation of IT Governance within their organizations.

This SIG is for IT practitioners only. Vendors must bring a practitioner to enter

Monday, February 15, 2010

7:30 AM - 10:00 AM

Topic: Data Governance Program

What does a successful and effective Master Data Management, Business Intelligence, and M&A Conversion have in common? The answer is that a 'Data Governance Program' is a critical component of all three initiatives. However, data governance still does not get as much attention as other types of governance. Few current governance frameworks even address data governance completely and accurately.

Frank Cerwin will be presenting his Data Governance Framework at the February IT Governance SIG meeting. Frank will present an overview of data governance, highlight the missing elements of other industry frameworks, and detail the components of a comprehensive framework.

Frank Cerwin is a consultant specializing in data architecture and data governance. Formerly, Frank was the Executive IT Director of Data Services for J.P.Morgan Chase with global responsibility for the data strategy, data architecture, data governance, and database administration of 3,000+ data stores across three lines of business.
